**Notes to Condensed Consolidated Interim Financial Statements**  
**30 September 2019**  
**Unaudited**

**1. General information**

URU Metals Limited (the "Company"), formerly known as Niger Uranium Limited, and before that, as UraMin Niger Limited, was incorporated in the British Virgin Islands ("BVI") on 21 May 2007. The Company's shares were admitted to trading on AIM, a market operated by the London Stock Exchange on 12 September 2007. The address of the Company's registered office is Intertrust, P.O. Box 92, Road Town, Tortola, British Virgin Islands, and its principal office is Suite 401, 4 King Street West, Toronto, Ontario, Canada, M5H 1A1.

On 21 November, 2018, the Company resolved to re-organise the Company's share capital by combining all of the Existing Ordinary Shares on the basis of one new ordinary share of no par value ('New Ordinary Share') for every 1,000 Existing Ordinary Shares, such shares having the same rights and being subject to the same restrictions as the Existing Ordinary Shares as set out in the Articles of the Company ('Consolidation'). All references to common shares, stock options and warrants have been fully retrospectively restated to reflect the Consolidation.

The unaudited condensed consolidated interim financial statements of the Group for the period ended 30 September 2019 comprise the Company and its subsidiaries.

**2. Nature of operations**

During the six months ended 30 September 2019, the Group's principal business activities were the exploration and development of mineral properties in South Africa.

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that planned exploration and development programs will result in profitable mining operations. The Group has not yet established whether its mineral properties contain reserves that are economically recoverable. Changes in future conditions could require material write-downs of the carrying values of mineral properties.

The Group is in the exploration stage and is subject to the risks and challenges similar to other companies in a comparable stage of development. These risks include, but are not limited to:

- Dependence on key individuals;
- receipt and maintenance of all required exploration permits and property titles;
- successful development; and
- as noted above, the ability to secure adequate financing to meet the minimum capital required to successfully develop the Group's projects and continue as a going concern.

### **3. Basis of preparation**

#### *(a) Statement of compliance*

The Company applies IFRS as issued by the International Accounting Standards Board ("IASB"). These unaudited condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting. Accordingly, they do not include all of the information required for full annual financial statements required by IFRS as issued by the IASB.

### **3. Basis of preparation (continued)**

#### *(a) Statement of compliance (continued)*

The policies applied in these unaudited condensed consolidated interim financial statements are based on IFRSs issued and outstanding as of 30 December 2019, the date the Board of Directors approved the statements. The same accounting policies and methods of computation are followed in these unaudited condensed consolidated interim financial statements as compared with the most recent annual consolidated financial statements as at and for the year ended 31 March 2018. Any subsequent changes to IFRS that are given effect in the Company's annual consolidated financial statements for the year ending 31 March 2019 could result in restatement of these unaudited condensed consolidated interim financial statements.

#### *(b) New accounting standards and interpretations*

The Group adopted the following Standards and Interpretations on 1 April, 2019:

- IFRS 16, 'Leases'
- IFRS 10 and IAS 28 (amendments), 'Sale or Contribution of Assets between an Investor and its Associate or Joint Venture'
- Amendments to IFRS 2, 'Classification and Measurement of Share-based Payment Transactions'
- Amendments to IAS 7, 'Disclosure Initiative'
- Amendments to IAS 12, 'Recognition of Deferred Tax Assets for Unrealised Losses'

The adoption of these Standards listed above did not have a material impact on the Group in future periods.

IFRS 16 is a significant change to lessee accounting and all leases will require balance sheet recognition of a liability and a right-of-use asset except short term leases and leases of low value assets. The effect on the Group was immaterial as the Group is currently not a party to any material operating leases as lessee or lessor.

A number of IFRS and IFRIC interpretations are also currently in issue which are not relevant for the Group's activities and which have not therefore been adopted in preparing these consolidated financial statements.

#### 4. Financial risk management

The Group's Board of Directors monitors and manages the financial risks relating to the operations of the Group. These include credit risk, liquidity risk and market risk which includes foreign currency and interest rate risks.

##### *Credit risk*

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Group's credit risk is primarily attributable to the Group's cash and cash equivalents and trade and other receivables. The Group has no allowance for impairment that might represent an estimate of incurred losses on other receivables. The Group has cash and cash equivalents of \$78,000 (31 March 2019 - \$475,000), which represent the maximum credit exposure on these assets. As at 30 September 2019, the majority of the cash and cash equivalents were held with a major Canadian chartered bank from which management believes the risk of loss to be minimal.

##### *Liquidity risk*

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

Typically the Group tries to ensure that it has sufficient cash on demand to meet expected operational expenses for a period of twelve months, including the servicing of financial obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted. Management monitors the rolling forecasts of the Group's liquidity reserve on the basis of expected cash flows.

The following are the contractual maturities of financial liabilities:

	Carrying amount \$'000	Contractual cash flows \$'000	6 months or less \$'000	6 months to 5 years \$'000
<b>30 September 2019</b>				
Trade and other payables	1,178	1,178	1,178	-
<b>31 March 2019</b>				
Trade and other payables	1,159	1,159	1,159	-

##### *Market risk*

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Group's loss or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

##### Foreign currency rate risk

The Group, operating internationally, is exposed to currency risk on purchases that are denominated in a currency other than the functional currency of the Group's entities, primarily Pound Sterling ("GBP"), the Canadian Dollar ("CAD"), the South African Rand ("ZAR"), Swedish Krona ("SEK") and the US Dollar ("USD").

The Group does not hedge its exposure to currency risk.

In respect of other monetary assets and liabilities denominated in foreign currencies, the Group's policy is to ensure that its net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short term imbalances.

The Group's exposure to foreign currency risk, based on notional amounts, was as follows:

	<b>USD \$'000</b>	<b>GBP \$'000</b>	<b>SEK \$'000</b>	<b>CAD \$'000</b>	<b>Total \$'000</b>
<b>30 September 2019</b>					
Cash and cash equivalents	-	54	-	24	78
Trade and other receivables	-	-	-	67	67
Trade and other payables	-	(201)	(53)	(924)	(1,178)
<b>31 March 2019</b>					
Cash and cash equivalents	-	466	-	9	475
Trade and other receivables	-	-	-	64	64
Trade and other payables	-	(201)	(53)	(905)	(1,159)

#### Interest rate risk

The financial assets and liabilities of the Group are subject to interest rate risk, based on changes in the prevailing interest rate. The Group does not enter into interest rate swap or derivative contracts. The primary goal of the Group's investment strategy is to make timely investments in listed or unlisted mining and mineral development properties to optimise shareholder value. Where appropriate, the Group will act as an active investor and will strive to advance corporate actions that deliver value adding outcomes. The Group will undertake joint ventures with companies that have the potential to realise value through mineral project development, and invest substantially in those joint ventures to advance asset development over the near term.

#### Sensitivity analysis

A 10% strengthening of the USD against the following currencies at the year end would have increased/(decreased) equity and profit or loss by the amounts shown below. This was determined by recalculating the USD balances held using a 10% greater exchange rate to the USD. This analysis assumes that all other variables, in particular interest rates, remain constant.

	<b>30 September 2019</b>		<b>31 March 2019</b>	
	<b>Equity \$'000</b>	<b>Profit or loss \$'000</b>	<b>Equity \$'000</b>	<b>Profit or loss \$'000</b>
GBP	-	15	-	(27)
CAD	-	83	-	83
SEK	-	5	-	6

## **5. Capital risk management**

The Group includes its share capital, share premium, reserves and accumulated deficit as capital. The Group's objective is to maintain a flexible capital structure which optimises the costs of capital at an acceptable risk. In light of economic changes and with the risk characteristics of the underlying assets, the Group manages the capital structure and makes adjustments to it. As the Group has no cash flow from operations and in order to maintain or adjust the capital structure, the Group may issue new shares, issue debt and/or find a strategic partner. The Group is not subject to externally imposed capital requirements.

The Group prepares annual expenditure budgets to facilitate the management of its capital requirements and updates them as necessary depending on various factors such as capital deployment and general industry conditions. During the six months ended 30 September 2019 there were no changes in the Group's approach to capital management.

## 6. Earnings per Share

The calculation of basic and diluted earnings per share is based on the result attributable to shareholders divided by the weighted average number of ordinary shares in issue in the year.

Basic earnings per share amounts are calculated by dividing net loss for the year attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the year.

The Company has potentially issuable shares which relate to share options issued to directors and third parties. In the six months ended 30 September 2019 and 30 September 2018 none of the options had a dilutive effect on the loss.

	Six months ended 30 September 2019	Six months ended 30 September 2018
Loss used in calculating basic and diluted earnings per share (\$)	(2,291)	(408)
<b>Number of shares</b>		
Weighted average number of shares for the purpose of basic earnings per share	779,944	780,571

Basic loss per share (US dollars)	(29.49)	(52.27)
Diluted loss per share (US dollars)	(29.49)	(52.27)

## 7. Long-term prepaid assets

	As at 30 September 2019	As at 31 March 2019
Long-term prepaid assets	41	41

On determination that an impairment charge was required for the Group's SSOAB Licences project, the Group identified a long-term prepaid asset for future drilling costs that may be applied to projects undertaken in other locations. Accordingly, the long-term prepaid asset was transferred out of intangible assets.

<b>CARRYING VALUE</b>	<b>\$'000</b>
At 31 March 2019	2,471
At 30 September 2019	2,673

The Group has operated three distinct projects, SSOAB Licences, Nueltin Licence and the South African Projects as detailed below:

The exploration costs, amortisation and impairment detailed in the above table are in respect of the Group's South African Projects only. The Group's exploration costs in respect of its SSOAB Licences project of \$1,145,000 were fully impaired at 31 March 2016 and the exploration costs in respect of its Nueltin Licence project of \$153,000 were fully impaired at 31 March 2015. The Burgersfort South African project has been fully impaired in these consolidated financial statements. At 30 September 2019 the carrying value is solely in relation to the Zebediela Nickel Project described below.

### **SSOAB Licences**

Svenska Skifferoljeaktiebolaget ("SSOAB") had 100% ownership of several exploration licences near the town of Örebro, Sweden. The Swedish licences are considered to be a single project, and thus to be one CGU. During the year ended 31 March 2016, due to the continued decline of the prices of oil and uranium, the Group decided not to pursue the development of SSOAB properties and therefore determined that the recoverable amount of the intangible assets under the SSOAB properties was estimated to be \$nil. The Group fully impaired the intangible assets in the consolidated statement of financial position for the year ended 31 March 2016. The foreign currency reserve of SSOAB was reclassified from equity to the consolidated statement of comprehensive income in the year ended 31 March 2017.

### **Nueltin Licence**

8373825 Canada Inc. ("Nueltin") was party to an option agreement with Cameco Corporation ("Cameco"), the holder of a licence located in the Nunavut Territory of Canada. Under the agreement, Nueltin could earn 51% interest in the project from Cameco in return for exclusively funding CDN\$2.5 million in exploration expenditure by 31 December 2016. The Cameco project was considered to be one CGU. The Group fully impaired the intangible assets in the consolidated statement of financial position in the year ended 31 March 2015 as the Group had no plans to pursue the project in Nunavut Territory and thus let the option expire.

### **South African Projects**

In November 2013, the Group acquired (i) a 100% interest in Southern Africa Nickel Limited ("SAN Ltd.") which had been the Group's joint venture partner since 2010 on the Zebediela Nickel Project and (ii) a 50% interest in the Burgersfort Project. SAN Ltd in turn had a 74% interest in a joint operation (the "SAN-Umnex Joint Venture"). The remaining 26% was held by Umnex Mineral Holdings Pty ("UMH"), which had title to the Zebediela licences through its subsidiary, UML. With the Group's acquisition of SAN Ltd., the SAN-URU joint venture was dissolved and San Ltd. obtained ownership of the JV's 50% interest in the Burgersfort Project with BSC Resources as the other party to the agreement. On 10 April 2014, SAN Ltd. and UMH agreed that SAN Ltd. would purchase 100% of Umnex Minerals Limpopo Pty ("UML") from UMH for consideration of 33,194,181 new Group shares and 8,000,000 bonus shares issued to directors and officers for their services in the acquisition of UML.

The Burgersfort Project extends over two adjacent prospecting rights in Burgersfort North and Burgersfort South. The Group has no plans to pursue the project and as announced on 31 May 2019 has fully impaired the intangible assets related to Burgersfort Project in the amount of \$868,000 in the consolidated statement of financial position as at 31 March 2019.

The Zebediela Nickel Project extends over three separate adjacent prospecting rights in the Limpopo Province of South Africa. All three rights are now held by Lesogo Platinum Uitloop Pty ("LPU"), which in turn is 100% owned by UML.

All three rights are currently compliant with minimum expenditure obligations, annual report submissions, annual prospecting fees, and submitted prospecting work programs.

Under the terms of the acquisition agreement, UMH is permitted to return the shares and take back the licences should the Group:

- fail to maintain adequate cash funds to meet its general and project expenditure obligations, or
- fail to meet the purchased rights' minimum statutory expenditure obligations

As at 30 September 2019, the "general and project expenditure obligations" and the "minimum statutory expenditure obligations" of the general and project expenditure obligations had not been determined.

Additionally, conditional consideration of 12,000 free-trading shares is payable if either 1) a transaction is consummated by the Group to sell, farm-out, or similarly dispose of any portion of a mineral project on some or all of the mining titles, or 2) a mining right is obtained from the South African Department of Mines and Resources in respect of some or all of the rights, or 3) an effective change of control of the Group occurs. As at 30 September 2019 none of the above conditions have occurred.

On 19 April 2017, the Group entered into a Corporate and Management Services Agreement (the "Agreement") with UMH. As per the Agreement, UMH shall provide to UML services including project management, coordination of mining rights application, mineral rights management, finance and accounting, technical, metallurgical, engineering and geological services and corporate finance and capital raising. In exchange of the services, UML will be earning the following fees:

1. Once the Bankable Feasibility Study commences a monthly retainer of ZAR150,000 until then a monthly retainer of ZAR75,000 will be paid;
2. First right of offer for technical, metallurgical, engineering and geological services at market related pricing;
3. Capital raising and corporate finance fees of 5% of the transaction value of capital raised through UMH sources;
4. UML will be issued a 1.5% royalty on all revenue generated from the Zebediela project. 1% of the royalty can be purchased back by the Company or its successor for the amount of \$2 million provided that the Company exercises this right within 24 months of the Mining Right being issued by the Department of Mineral Resources of South Africa.

On 4 December 2018 the Company announced that the South African Department of Mineral Resources had formally approved and executed the renewal of the primary prospecting right. The right will expire on 2 December 2021.

## 10. Financial assets at fair value through other comprehensive income

	As at 30 September 2019 \$'000	As at 31 March 2019 \$'000
At beginning of the period	1,676	1,676
Fair value adjustment through other comprehensive income	(876)	(876)
Impairment	(686)	(686)
Foreign exchange (loss)	(114)	(114)
At end of the period	-	-

On 1 March 2017, the Group acquired 7,550,000 shares of Management Resource Solutions Plc ("MRS") for £0.15 per share by issuance of 25,166,666 ordinary shares of the Group. The fair value of the MRS shares was determined to be the value of the shares of the Group issued, as MRS was a public company whose shares were not trading at the time and the market price was not available. On 5 May 2017, the MRS shares resumed trading on the AIM market of the London Stock Exchange.

During the year ended 31 March 2018 the Group acquired an additional 10,000,000 ordinary shares of MRS at £0.05 per share. At 30 September 2019 and 31 March 2019 the Group held 17,550,000 ordinary shares.

On 4 September 2019, London Stock Exchange temporarily suspended the trading of MRS shares as two of the company's principal subsidiaries were placed into administration. As a result, the Group recorded a full impairment of the MRS shares which has been included as an exceptional item in profit and loss.

Management have assessed whether the Group exercises significant influence over MRS in accordance with the accounting policy. Management have taken into consideration the criteria as set out in IAS 28 'Investments in Associates' and have determined that the Group did not exercise significant influence over MRS during the year. J. Zorbas was a non-executive director of MRS until his resignation on 30 August 2019.

## 11 Trade and other receivables

### Issued shares

All issued shares are fully paid up.

Authorised: unlimited number of common shares. There are no preferences or restrictions attached to any classes of common shares.

### Unissued shares

In terms of the BVI Business Companies Act, any unissued shares are under the control of the Directors.

### Dividends

Dividends declared and paid by the Group were \$nil for the year ended 30 September 2019 (2018 - \$nil).

## 13. Reserves

### (a) Share option and warrants reserve

The Share Option Plan is administered by the Board of Directors, which determines individual eligibility under the plan for optioning to each individual. Below is disclosure of the movement of the Group's share options as well as a reconciliation of the number and weighted average exercise price of the Group's share options outstanding on 31 March 2019 and 31 March 2018.

The assessed fair value at grant date is determined using the Black-Scholes Model that takes into account the exercise price, the term of the option, the share price at grant date, the expected price volatility of the underlying share, the expected dividend yield and the risk-free interest rate for the term of the option.

#### (i) Reconciliation of share options outstanding as at 30 September 2019:

Exercise prices (£)	Weighted average remaining life (years)	Number of options outstanding	Number exercisable
60	2.65	15,050	15,050
90	2.65	15,150	15,150
49	1.06	2,633	2,633
70	2.52	32,833	32,833

#### (ii) Continuity and exercise price

The number and weighted average exercise prices of share options are as follows:

	Number of options	Weighted average exercise price per share (£)
At 31 March 2019 and 30 September 2019	32,833	70

The following is a summary of the Group's warrants granted under its Share Incentive Scheme. As at 30 September 2019 the following warrants, issued in respect of capital raising, had been granted but not exercised:

Name	Date granted	Date vested	Number of warrants	Exercise price (£)	Expiry date	Fair value at grant date (£)
Beaumont	9 October 2009	9 October 2009	100	345	9 October 2019	345

These warrants expired unexercised subsequent to 30 September 2019.

### (b) Foreign Currency Translation Reserve

The Foreign Currency Translation Reserve represents foreign currency differences recognised directly in other comprehensive income when assets and liabilities of foreign operations are translated to the Group's presentational currency at exchange rates at the reporting date and income and expenses are translated to the Group's presentational currency at average exchange rates.

#### 14. Trade and other payables

## 16. Segmental information

### (a) Reportable segments

The Group has two reportable segments, as described below, which are the Group's strategic business units. Both are determined by the CEO, the Group's chief operating decision-maker, and have not changed in the year. The strategic business units offer different services, and are managed separately because they require different strategies.

The following summary describes the operations in each of the Group's reportable segments:

Exploration	Includes obtaining licences and exploring these licence areas.
Corporate Office	Includes all Group administration and procurement

There are no other operations that meet any of the quantitative thresholds for determining reportable segments during the periods ended 30 September 2019 and 2018.

There are varying levels of integration between the Exploration and Corporate Office reportable segments. This integration includes shared administration and procurement services.

Information regarding the results of each reportable segment is included below. Performance is measured based on segmented results. Any inter-segment transactions would be determined on an arm's length basis. Inter-segment pricing for the periods ended 30 September 2019 and 2018 consisted of funding advanced from Corporate Office to Exploration.
